Request Samples

1) POST /api/advertisements/generate

```
{
  "assessment_id": "00000000-0000-0000-0000-000000000000",
  "application_start_date": "2026-06-01",
  "application_end_date": "2026-06-30",
  "qualification_requirements": "As per AICTE/DTE norms",
  "required_documents": "Degree Certificates, Mark Sheets, ID Proof",
  "important_instructions": "Original documents required at interview",
  "interview_venue": "Institution Campus"
}
```

2) POST /api/advertisements/generate-ai

```
{
  "institution_id": 1,
  "branch_id": 10,
  "vacancy_count": 4,
  "deadline": "2026-06-30",
  "application_mode": "Walk-in"
}
```

3) PUT /api/advertisements/{advertisement_id}

```
{
  "content_en": "Updated English ad content",
  "content_mr": "Updated Marathi ad content",
  "application_start_date": "2026-06-01",
  "application_end_date": "2026-06-30",
  "qualification_requirements": "As per norms",
  "required_documents": "Degree, Marksheet, ID",
  "important_instructions": "Bring originals",
  "interview_venue": "Main Building"
}
```

4) POST /api/advertisements/{advertisement_id}/approve

```
{
  "action": "APPROVE",
  "remarks": "Looks good"
}
```

or

```
{
  "action": "REJECT",
  "remarks": "Please fix eligibility section"
}
```

Step 4: Application APIs

Base Path: /api

Method	Endpoint	Role	Purpose
POST	/applications	CANDIDATE	Create application draft
POST	/applications/{application_id}/documents	CANDIDATE	Upload document (AI scrutiny queued)
POST	/applications/{application_id}/analyze-ai	PRINCIPAL, ADMIN	Trigger on-demand AI scrutiny
GET	/applications/{application_id}/ai-summary	PRINCIPAL, ADMIN	Get AI scrutiny summary
GET	/applications/{application_id}/documents	CANDIDATE, PRINCIPAL	List uploaded documents
POST	/applications/{application_id}/submit	CANDIDATE	Submit application
DELETE	/applications/{application_id}/withdraw	CANDIDATE	Withdraw application
GET	/applications/my	CANDIDATE	List candidate applications
GET	/applications	PRINCIPAL, ADMIN	List applications with filters

Request Samples

1) POST /api/applications

```
{
  "advertisement_id": "00000000-0000-0000-0000-000000000000",
  "applied_designation": "Clock Hour Basis Lecturer"
}
```

2) POST /api/applications/{application_id}/documents

multipart/form-data:

- document_type: PHOTO | SIGNATURE | AADHAR | PAN | DEGREE_CERTIFICATE | MARKSHEET | EXPERIENCE_LETTER | CASTE_CERTIFICATE
- file: binary (pdf/jpeg/png/tiff)

3) POST /api/applications/{application_id}/analyze-ai

No body required.

4) POST /api/applications/{application_id}/submit

```
{
  "declaration_accepted": true
}
```

Common Query Params

Step 3

GET /api/advertisements/published?institution_id=1&branch_id=10&academic_year=2026-2027

Step 4

GET /api/applications?advertisement_id=<UUID>&status=SUBMITTED&branch_id=10&academic_year=2026-2027

Important Frontend Notes

- Use real UUIDs for application_id and advertisement_id path params.
- Step 4 upload returns immediate success and queues AI in background; poll GET /applications/{id}/ai-summary.
- Step 3 approval requires remarks when rejecting.
- Candidate: apply/upload/submit/withdraw/my applications.
- Principal/Admin: AI summary/analyze, application listing, advertisement workflows.
